

AMIPS - CARRIERES n° 406 Avril 2007

sanofi pasteur

La division vaccins du Groupe sanofi-aventis.

Clinical Team Leaders Global Clinical Development, Vaccines

**Opportunities at the leading edge of clinical development for MD/ PhD's
with a research background**

**Excellent salary, bonus and benefits package
(Including 53 days annual leave)**

Based Lyon, France

Headquartered in Lyon, France, Sanofi Pasteur is the largest company in the world devoted entirely to human vaccines. Our state-of-the-art vaccines positively impact the health of millions of people, providing protection from infectious diseases and cancers. Demand for our vaccines is expected to double within the next five years.

We have an exciting pipeline of novel vaccines against diseases for which there are pressing needs; including malaria, meningitis B, dengue fever, pneumococcal disease, CMV, chlamydia, HIV and cancer; and we are at the leading edge of the response to the global challenge of pandemic influenza preparedness.

The Opportunity

Candidates for this position will be MDs or PhDs. You may be working in clinical practice or academia, and keen to develop your career within one of the most exciting sectors of the pharmaceutical industry. Alternatively, you may already be working in the pharmaceutical industry - perhaps in a clinical pharmacology / PK, or clinical development role and be keen to extend your clinical development experience.

You will define and manage the global clinical development strategy for one or more clinical development project; subject to the project, this will include design of global clinical development plans and protocols across a range of phases, including the pre clinical/clinical transition, early phase development and critical phase III studies to support regulatory filings. This is a high profile role, demanding a high level of cross-functional working with colleagues in pre-clinical, regulatory affairs, commercial and project management. Extensive training and mentoring will be provided.

Candidate Profile

Candidates will need a track record of designing, implementing and conducting pre-clinical/clinical studies as part of academic, public health or clinical research. An understanding of the clinical aspects of infectious diseases - virology, immunology or microbiology would be very useful **but is not essential**. You will need to demonstrate the core interpersonal skills, including international outlook, excellent presentation and
